7. Persons planning to attend UNISPACE III who will also be attending the Special Environmental Symposium to be held jointly by the International Astronomical Union, the

Committee on Space Research and the International Union of Radio Science from 12 to 16 July 1999 or the forty-second session of the Committee on the Peaceful Uses of Outer Space, to be held from 14 to 16 July 1999, may register early for the Conference in the rotunda (Building C) of the VIC during the following periods:

Monday and Tuesday,
12 and 13 July 1999 8.30 a.m.-3 p.m.

Wednesday-Friday,
14-16 July 8.30 a.m.-5 p.m.

8. Admission to the Conference premises (the Austria Center Vienna and the VIC) will require, except in the case of the space exhibition, the presentation of appropriate grounds passes. All participants in the Conference (members of official delegations of Member States, representatives of organizations in the United Nations system, observers for other international organizations, non-governmental organizations, national organizations and space-related industries, participants in the Technical Forum, exhibitors and members of the press) will therefore need to register and/or obtain grounds passes at the registration counter. Members of official delegations who are already in possession of valid VIC grounds passes will not need additional identification badges; however, other participants who are already in possession of valid VIC grounds passes are requested to register in order to assist the executive secretariat in compiling the list of Conference participants.

9. In order to reduce the number of persons registering during peak times, Conference participants who are in a position to register prior to 18 July 1999 are kindly requested to do so.

10. The loss of a grounds pass must be reported immediately to security personnel.

11. The names of the members of the official delegations of Member States, organizations in the United Nations system, and international organizations having permanent observer status with the General Assembly or the Committee on the Peaceful Uses of Outer Space and other international organizations or bodies having received official invitations to the Conference should be communicated directly to the executive secretariat by their Governments or international organizations.

12. Delegations of States participating in the Conference are reminded that credentials of representatives to the Conference should be submitted to the executive secretariat, if possible not less than one week before the opening of the Conference, and signed either by the Head of State or Government or by the Minister of Foreign Affairs. All other communications in this respect will be considered provisional credentials until such time as formal credentials are received by the executive secretariat.

13. As agreed by the Preparatory Committee, national organizations, including space-related industries, will be invited through their respective Governments to participate as observers in the Conference. Observers for those national organizations and industries should obtain registration forms from their ministries of foreign affairs (or the equivalent). Their completed forms should be returned to the executive secretariat through their Governments as soon as possible, no later than one week before the opening of the Conference.

14. Persons participating primarily in one or more activities of the Technical Forum (forums, panels, seminars, workshops etc.) or the Space Generation Forum should contact the coordinators of those activities to receive invitations. The contact addresses may be obtained from the Office for Outer Space Affairs or from its home page (http://www.un.or.at/OOSA). Registration forms, together with invitations, will be provided by the coordinators. In order to avoid unnecessary delays in the registration, only one activity of the Technical Forum should be indicated on the registration form; however, all activities of the Technical Forum will be open to all registered participants of the Conference. Completed forms should be returned to the executive secretariat through the coordinators as soon as possible, no later than one week before the opening of the Conference.

15. Observers for non-governmental organizations and industries, participants in the Technical Forum and the Space Generation Forum and exhibitors may participate in all Technical Forum activities and the space exhibition. In addition, persons who are not members of official delegations may participate as observers in open intergovernmental meetings of the Conference, subject to the availability of seats in the meeting rooms.

16. Exhibitors in the space exhibition should request registration forms from the American Institute of Aeronautics and Astronautics, which is coordinating the organization of the exhibition. Requests may be made by telephone (800-739-4424 or +1 (703) 264-7535) or by fax: (+1 (703) 264-7551), or by writing to the following address:

Howard O'Brien Jr.
American Institute of Aeronautics and Astronautics
1801 Alexander Bell Drive, Suite 500
Reston, Virginia, 20191-4344
United States of America

VI. Programme of meetings

17. The programme of meetings is set out in the final Programme of the Conference (booklet). In addition, the programme of meetings will appear in the Journal of the Conference, which will be issued on a daily basis, specifying the conference rooms and times of all meetings. That information will also be shown on television monitors in the Austria Center Vienna and in the VIC (Building C).

VII. Organization of work of the Conference

18. The work of the Conference itself will take place in the Plenary, in Committee I and in Committee II, in accordance with the rules of procedure of the Conference. In general, meetings of the Plenary, Committee I and Committee II will be conducted in parallel in the Austria Center Vienna. An indicative (tentative) schedule of work for each of those three bodies is contained in annex I to the annotated provisional agenda of the Conference (A/CONF.184/1) and in the final Programme of the Conference (booklet).

VIII. Technical Forum

19. In addition to the Plenary, Committee I and Committee II, the Conference will establish a Technical Forum as a technical body of the Conference, pursuant to its rules of procedure. The Technical Forum will deal with technical presentations relating to the agenda of the Conference, as well as additional components of the Conference, such as workshops and seminars, the space exhibition and the Space Generation Forum. The Conference may, in addition, request that any substantive agenda item be dealt with in the Technical Forum.

20. The Technical Forum will be presided over by the Chairman of the Technical Forum, who will be responsible for the general conduct of the business of the Forum and the coordination of its work. The Chairman of the Technical Forum will report to the intergovernmental bodies of the Conference on the work of the technical presentation sessions and workshops dealing with substantive items, as well as other activities organized within the Technical Forum that are deemed important to the work of the Conference, and will forward for consideration or information, as appropriate, summaries of conclusions or proposals of the various bodies of the Technical Forum.

21. The organizers of each activity of the Technical Forum will appoint a chairman, rapporteur and any other officers for the activity as may be deemed necessary for the conduct of its work.

22. A full report of each activity of the Technical Forum will be issued as a conference document to be circulated after the Conference and also included in the proceedings of the Conference. The reports should be made available to the Secretariat by 6 September 1999. In addition, where it is considered appropriate, for each activity a summary of conclusions or proposals might be prepared, to be submitted to the intergovernmental bodies of the Conference for consideration. Each summary will be translated into the languages of the Conference and should be limited to one page. The rapporteur for each activity will be responsible for submitting the summary through the executive secretariat to the Chairman of the Technical Forum in time for its consideration by the intergovernmental bodies of the Conference and for ensuring that it does not duplicate proposals already contained in the draft report of the Conference. Rapporteurs are also encouraged to provide, with the assistance of the executive secretariat, written highlights of their activities for use in daily press releases. Additional organizational details for the Technical Forum activities will be communicated separately to activity organizers by the executive secretariat.

23. Detailed information on each of the various activities of the Technical Forum is set out in the final Programme of the Conference (booklet) and may also be found on the home page of the Office for Outer Space Affairs (http://www.un.or.at/OOSA).

IX. Seating arrangements

24. At the opening of the Conference and at subsequent meetings of the Plenary, Committee I and Committee II, each government delegation will be assigned four seats: two seats at a table and two seats behind. Other seats will be identified as being for use by other participants at the Conference.

X. Informal and bilateral consultations

25. Conference participants wishing to arrange meetings of regional groups and other informal and bilateral consultations prior to or during the Conference may wish to contact Gabriele Wagner of Conference Services (room D0705, United Nations Office at Vienna, P.O. Box 500, A-1400 Vienna, Austria; telephone (+43 1) 26060-3114) concerning the availability of rooms at the Austria Center Vienna and the VIC. In view of the fact that the majority of the rooms at the Austria Center Vienna will be

utilized for the Conference, it is likely that most such meetings and consultations will have to take place in the VIC. Because room availability in general is limited, requests for rooms for meetings, with the exception of meetings of regional groups, will be dealt with on a "first come, first served" basis.

XI. Languages and records of the Conference

26. Arabic, Chinese, English, French, Russian and Spanish will be the languages of the Conference.

27. Statements made in a language of the Conference during meetings of the Plenary, Committee I or Committee II will be interpreted into other languages of the Conference. Statements made during activities of the Technical Forum will only be interpreted where interpretation facilities are possible within available resources.

28. A representative may speak in a language other than the language of the Conference if he or she provides for interpretation into one language of the Conference.

29. Each seat in the meeting rooms at the Austria Center Vienna with simultaneous interpretation equipment will be provided with a portable receiving set and headphones. Participants are requested not to remove the portable receiving sets and headphones from the meeting rooms so that the equipment may be checked and, if necessary, adjusted before the next meeting takes place.

30. Sound recordings of meetings of the Plenary, Committee I and Committee II will be made and kept in accordance with the practice of the United Nations. Unless otherwise decided, no such recordings will be made of the Technical Forum or of the meetings of any working group.

31. All versions of the draft report of the Conference and its subsidiary bodies to be issued during the Conference, as well as final documents of the Conference for submission to the General Assembly, will be translated and issued in all languages of the Conference.

32. Working papers intended as in-session documents for the Conference that have been submitted by Member States in one of the languages of the Conference will be translated and issued in all languages of the Conference in time for consideration by the Conference.

National papers

33. National papers will be issued only in the languages of original submission. Member States should submit a sufficient number of copies of their national papers for distribution to Conference participants. (The minimum numbers recommended are as follows: (a) for distribution in one language of the Conference: 1,000 copies; or (b) for distribution in all languages of the Conference: 50 copies in Arabic, 50 copies in Chinese, 600 copies in English, 150 copies in French, 50 copies in Russian and 150 copies in Spanish.) Abstracts of the papers, submitted in one of the official languages of the United Nations, will be translated and issued in all languages of the Conference.

Statements

34. A minimum of 30 copies of the text of statements to be delivered in the meetings of the intergovernmental bodies of the Conference should be given in advance to the conference officer in order to ensure the best possible interpretation and other services. Speakers wishing to circulate their speeches to all Conference participants are required to give to the conference officers, who will be in the conference rooms, a sufficient number of copies of the speeches. (The minimum numbers recommended are as follows: (a) for distribution in one language of the Conference: 1,000 copies; or (b) for distribution in all languages of the Conference: 50 copies in Arabic, 50 copies in Chinese, 600 copies in English, 150 copies in French, 50 copies in Russian and 150 copies in Spanish.) All texts should be delivered before the speaker takes the floor, preferably at the start of the meeting. Conference participants are reminded that the executive secretariat will not be in a position to offer reproduction services for such texts.

35. If participants wish their statements to be provided to the media at the Conference site, they should provide a minimum of 30 copies to representatives of the United Nations Information Service at the Conference media centre.

XII. Distribution of official documents

36. The main document distribution counter will be located at the Austria Center Vienna (main entrance level).

37. Each delegation will be assigned a box, or pigeon-hole, at the document distribution counter in which copies of all official documents issued during the Conference will be placed. Delegations are reminded that the pigeon-holes are to be used exclusively for the distribution of official documents of the Conference and may not be used for the circulation of any other papers or documents.

38. To determine the exact requirements of official documents, each delegation should advise the staff at the document distribution counter of its requirements in terms of the number of copies of each document and the language versions that it wishes to receive during the Conference. It

will not be possible to provide complete sets of documents after the end of the Conference.

39. Other accredited participants (of the Technical Forum, the Space Generation Forum and the space exhibition) and representatives of the press/media will be able to obtain official documents of the Conference at a designated document distribution desk.

XIII. Receipt and circulation of other documents

40. Other documents that Governments and organizations accredited to the Conference may wish to make available to Conference participants are to be provided by those Governments and organizations in appropriate languages and quantities. The executive secretariat will not reproduce or translate such documents.

41. There can be no official distribution of such documents by the executive secretariat; however, they will be made available on tables set aside for that purpose. Separate tables will also be made available for the distribution of documents at individual sessions of the Technical Forum.

Box 500, A-1400 Vienna, Austria; telephone (+43 1) 26060-3342; fax: (+43 1) 26060-5899).

44. Daily press briefings by the United Nations Information Service spokesperson for the Conference will be given in a press briefing room, which can also be used for press conferences by officers of the Conference, members of the executive secretariat, delegations and other participants. Requests for press conferences should be directed to the spokesperson.
